

JEREMY A. GUNAWAN

Address: Jl. Sawo No. 8, Gondangdia | Jakarta, Indonesia 10350 | +62 82199003874 | jeremyanthony3104@gmail.com | [LinkedIn](#)

EDUCATION

Binus University, Jakarta, Indonesia
Sarjana Komputer (S.Kom.).

Expected Sept 2028
Cumulative GPA: 3.62/4.0

Major: Data Science

University of Melbourne, Melbourne, Australia
Bachelor of Science - B. S.

July 2023 – Nov 2023

Major: Data Science

Completed Foundational Studies at Trinity College

June 2022 – Feb 2023

SMA Kanisius Jakarta, Jakarta, Indonesia

Graduated April 2022

High School Diploma, Natural Sciences

PROFESSIONAL TRAINING & RELEVANT EXPERIENCE

Benemica, *Intern Developer*, Jakarta, Indonesia

July 2025 - Sept 2026

- Contributed to the front-end and back-end development of an E-Invoice application, enabling clients to generate recurring invoices through template mapping, Excel-based quantity uploads, automated tax calculations, and XML files for Coretax Faktur Pajak submission.
- Supported the development of Mica HelpDesk AI, an AI-powered employee support chatbot using Retrieval-Augmented Generation (RAG), vector embeddings, and a three-level escalation workflow involving AI, IT support, and HR.
- Developed an internal IT Monitoring Dashboard to provide centralized statistics on application errors, bugs, and system issues, with automatic data refresh every five minutes.
- Contributed to the migration of Benemica's Payroll and HRIS SaaS platform from .NET Framework 4.8 to .NET 8, covering Class Libraries, APIs, Employee Self-Service (ESS), and Payroll applications.
- Assisted in updating legacy code, system configurations, authentication, database integrations, dependencies, testing, and compatibility issue resolution

Dexa Medica, *Data Science Intern*, Bintaro, Indonesia

April 2024 – Aug 2024

- Built a machine learning model for price forecasting with over 85% accuracy, leveraging Python and regression analysis to optimize pricing strategies and boost revenue
- Enhanced the IT support chatbot using natural language processing (NLP) techniques, increasing customer satisfaction by 30% and streamlining response times for support tickets
- Extracted and analyzed large datasets using SQL, presenting insights into senior management through data visualizations in Tableau, which informed strategic business decisions

Brunetti Oro Flinders Lane, *Kitchen Hand*, Melbourne, Australia

Sept 2022 – Feb 2023

- Assisted in preparing and serving a high volume of orders in a fast-paced café environment, ensuring adherence to quality and presentation standards while maintaining kitchen efficiency.
- Managed inventory and stock levels by conducting daily checks, optimizing supply usage, and reducing waste to enhance cost control.
- Maintained a clean and sanitary workspace, consistently following food safety protocols, and supported team operations during peak hours through effective multitasking and teamwork

Purwadhika Digital School, *Data Science Bootcamp*, Jakarta, Indonesia

March 2023 – Aug 2023

Supermarket Campaign Analysis

- Conducted exploratory data analysis on customer demographics and spending patterns from 2012 to 2014, identifying key factors influencing customer engagement across six marketing campaigns
- Utilized data segmentation techniques to classify customers based on purchase behavior, enabling targeted promotional strategies to maximize campaign reach and effectiveness
- Delivered actionable insights through data visualization and reporting, supporting management in refining marketing initiatives to boost customer participation rates

Daegu Apartment Price Prediction

- Developed machine learning model using Daegu apartment data to predict property prices, assisting real estate agents in optimizing marketing strategies for targeted promotions
- Analyzed key features such as location, amenities, and sale prices to understand factors influencing customer satisfaction, which informed data-driven recommendations for property listings
- Employed data preprocessing, feature engineering, and model evaluation techniques, achieving high predictive accuracy and contributing to enhanced decision-making in the real estate sector

Bank Telemarketing Campaign Analysis

- Built a machine learning model with a precision-based approach to identify high-potential customers for term-deposit promotions, leveraging features like education level and marital status
- Analyzed customer behavior patterns and demographics, enabling targeted marketing efforts that improved conversion rates and campaign efficiency
- Visualized key findings using Tableau, creating an interactive dashboard for stakeholders to explore campaign performance and optimize future marketing strategies

LEADERSHIP & ACTIVITIES

Ignatian Leadership Training, *Mentor*, Jakarta, Indonesia

Oct 2021

– Nov 2021

- Mentored 10th-grade students at SMA Kanisius Jakarta, supporting their adjustment to the school environment and curriculum.
- Assisted students in overcoming challenges, particularly in socializing with peers.

SKILLS AND INTERESTS

Technical – Microsoft Office, Jupyter, Tableau, Machine Learning, Data Science, Data Visualization, Python, SQL

Language – native Bahasa Indonesia speaker, fluent English, elementary Mandarin Chinese

Interests – Tennis, Badminton, Golf, Table Tennis

Awards – Won 5 table tennis competition during high school at SMA Kanisius Jakarta
